Position Summary

The main purpose of this position is to ensure the efficient maintenance and repair of Bailey Metal Processing equipment and facilities, while meeting safety, quality, and productivity standards.

What you'll do:

- Perform preventive maintenance tasks and troubleshoot equipment issues to ensure continuous operation of machinery and equipment.
- Coordinate and schedule maintenance activities to meet production and customer requirements.
- Maintain schedules and procedures for preventive maintenance programs.
- Record equipment downtime and repairs in the maintenance system.
- Plan, organize, transfer, and install machinery and equipment as per manufacturer's instructions without compromising safety.
- Identify and implement work measures to continually improve maintenance work methods, safety, systems, productivity, costs and quality of service.
- Maintain a working knowledge of all Health & Safety policies.
- Correct and communicate any unsafe acts/conditions to the plant/safety manager.
- Support and promote all aspects of the corporate Health & Safety program.

What you'll need:

- Minimum 5 years' experience in maintaining and repairing industrial machinery and equipment in a steel processing or steel making environment is preferred.
- Hydraulic and Cooling systems and Heavy equipment experience are essential.
- Welding skills operating Mig/Mag and Tig welders are an asset.
- Forklift & Overhead Crane repair and operation knowledge is an asset.
- Must be proficient in speaking, writing & reading English.

Working Conditions:

- Work in a fast-paced environment.
- Able to physically lift material up to 50 pounds.
- Able to work overtime as required.
