Position Summary

Millwright will carry out repair and preventive maintenance activities. This includes promptly diagnosing, troubleshooting, repairing and replacing parts for flat roll steel slitting lines, packaging equipment, banding tools and hydraulic, pneumatic and mechanical systems.

What you'll do:

- Ensure the maintenance and repair of Bailey's machinery, equipment, hydraulic, electrical, pneumatic and mechanical systems while meeting scheduling priorities, safety, quality productivity and reliability requirements.
- Supervise, co-ordinate and daily schedule the activities of maintenance workers to ensure orders can be completed meeting customers' & inter departmental requirements.
- Develop, implement & maintain schedules & procedures for preventive maintenance programs in coordination with necessary departments and maintain logs / documents.
- Advise daily the required repair time to scheduling, and production department if it takes more than 24 hours; Record equipment downtime and repair done in a systematic way.
- Assist in the sourcing, negotiation and administration of contracts for the provision of supplies, parts and services for maintenance including annual inspection of material handling equipment.
- Plan, organize, transfer, and install machineries and equipment as per manufacturer's instructions without compromising safety.
- Report daily and update on equipment requiring preventive maintenance, repair, or replacement of parts. Develop required reporting forms, and documentation.
- Help plan, monitor and manage maintenance budget.
- Identify and implement work measures to continually improve maintenance work methods, systems, productivity, safety, and quality of service.
- Collaborate with and support the national technical team in various branches as required.
- Provide any other assistance as requested by the management.

What you'll need:

- 5-7 years' experience in a steel processing or steel making plant environment is preferred.
- Electronic/Instrumentation maintenance experience is essential.
- Hydraulic systems and heavy equipment experience is essential.
- Welding skills operating mig and tig welders is an asset.
- Forklift & overhead crane repair knowledge is an asset.
- Computer skills, including knowledge of MS Outlook and Excel are required.
